The Manager,
Insultec IPT
P.O. Box1054
Booragoon, WA 6154

ATTENTION; Mr. Terry Ross

Dear Sir,

Re: PREMISES 16 CLUNE STREET, BAYSWATER.

We purchased the above factory in 1988 and have experienced a problem with the building each summer, because it is of steel clad construction and is un-insulated. Internal temperatures during the summer reach 41⁰C inside the building, making working conditions intolerable.

After investigating several proposals for ventilating and insulating the building we decided to have the exterior coated with Insultec 2 and are very pleased with the results that have been achieved through this summer.

Our staff report that they have not been inconvenienced by high temperatures at any time this summer and on a day of 38⁰C outside shade temperature, the internal temperature of the building was only 31⁰C.

We most certainly would recommend this treatment as a successful method of insulating steel buildings.

Yours faithfully
GRANT ELECTRICAL INDUSTRIES PTY LTD.

J. A. GRANT
